

IRAN RENEWABLE ENERGY CONFERENCE

The 7th Iran Renewable Energy Conference and Exhibition

IRAN REC 2023

IRIB International Conference Center / January 28-29 2023

- Ministry of Renewable Energy and Energy Efficiency Organization (MREEO)
- Ministry of Science, Research and Technology
- Ministry of Industry, Mine & Trade
- Ministry of Energy
- Center for Programs and Development of Iran
- Organization for Treatment, Economics and Technical Assistance of Iran
- Department of Environment
- NRI
- The Embassy of the Republic of Korea

Seyed Moslem Mousavi
Managing Director of the Association
and Secretary of the Conference

Welcome to IRAN REC 2023

It would be our pleasure to welcome you to Iran REC 2023, and it is also our pride and honor that this conference is going to be held with support of the most important stakeholders of renewable energy in Iran as well as our six successful past events.

Iranian market has recently witnessed growing enthusiasm and interest in international companies and investors during recent years.

Having a huge potential in R.E. development, and with policymakers showing a great interest in boosting the R.E. in the country, Iran welcomes international investors. It is the right time to seek entering this attractive newly opened market.

Iran Renewable Energy Conference (Iran REC) has been organized to provide in depth prospects of the current and future of R.E. in Iran, allowing a comprehensive understanding about the technological capabilities of active Iranian companies in this field as well as the technological cooperation potential with international investors.

Our agenda covers topics including but not limited to, opportunities for international cooperation on renewable electricity export to neighboring countries, localization of solar and wind power plants' equipment supplement, renewable energy impacts on clean transportation, international investment, new methods of financing solar and wind power plants, subsidies of energy carriers and procedures of implementing R.E. projects.

The conference is packed with unique opportunities to learn about the market as much as possible and to meet high ranked Iranian governmental authorities, company representatives, and investors to assess the market directly, to discuss the underway projects and to find the way to this highly potential market.

We invite you to attend Iran REC 2023, and use this opportunity to achieve the mutual benefits of our cooperation. Your kind participation is highly appreciated and welcomed by our team in Iran REC.

Participating in Exhibitions

In a clear and comprehensive definition, participating in centralized exhibition can be considered a live advertising. Because, in such exhibitions, the most important factors in every market such as manufacturers, distributors, and consumers of products and services gather together in one time and place.

Nowadays, most marketing experts consider exhibition participation one of the most important methods of advertising and marketing and decisively prove that the efficiency of company's direct presence in exhibitions is many times over the costs such as booth construction and other direct and indirect costs of participating in the exhibition.

Main Goals

- Increase in sales and market share
- Gaining fame and credit
- Enhancing PR and customer relationship
- Making a strong and positive mindset in favor of the product and the company

Sponsorship

Financial Support Opportunities

The presence of high-ranking political and economic figures, companies and international organizations in international conferences encourages entrepreneurs and business owners to take the opportunity to speak and showcase their brand and products to improve it in the best way possible. Also, having access to sensitive situations for specific speeches in the margins of the conference can lead to the absorption of technical and economic power and the needs of active companies. The executive team of Iran REC, by providing various facilities and accesses at different levels, provides the opportunity for those interested in giving speeches and giving an award or displaying the logo during the conference in different ways, presenting content, or taking advantage of articles, communications, networking, and so forth. These levels are carefully categorized according to the level of capability and needs of the audience. You can confidently storm the most specialized renewable energy conference in Iran to be seen better. The experience of the past years confirms that designing a professional program for meetings and lectures has been significantly effective in business development.

Conference

According to previous years, Iran Renewable Energy Association is holding the Sixth Iran International Renewable Energy Conference and Exhibition (Iran REC 2023). This international seventh will be held on January 28th and 29th under the chairmanship of Dr. Zabet and with the presence of prominent domestic and foreign figures and companies in the field of renewable energy in Tehran. This gathering is the largest gathering of the renewable energy family in Iran. The executive team of the Iranian Renewable Energy Association, by providing a dedicated space in the form of exhibitions and business meetings, as well as financial support opportunities, has increasingly tried to facilitate the provision of services and products and express capabilities and display the business symbol of active companies in this field. This year, for the third time in the country, Iran Renewable Energy Association and the Policy Making Committee consisting of 30 main organizations involved in renewable energy field will introduce and appreciate the extensive efforts of active companies and individuals and grant "The Fourth Iran Renewable Energy Award".

Korea - Iran Renewable Energy Forum

The Latest Technology Development in Renewable Energy

Korea - Iran Renewable Energy Forum is an outstanding opportunity for those who want to start a new chapter of their business after COVID19- pandemic. This is a great side event for both Korean and Iranian stakeholders to get familiar with each other. This year, Iran REC hopes to repeat its fruitful collaboration with the embassy of the Republic of Korea sponsoring Korea - Iran Renewable Energy Forum as the side event of the seventh International Iran Renewable Energy Conference and Exhibition (Iran REC 2023). The panel's topic is the latest technology development on renewable energy which will be held on the second day of Iran REC 2023, on January 28th.

The Embassy of the Republic of Korea

About us

Iran Renewable Energy Association (IrREA) is the only independent non-governmental association in the Islamic Republic of Iran focusing on all kinds of renewable energy. The main activities of IrREA are increasing awareness, legitimation, promoting and institutionalizing the development of clean energy including wind, solar, biomass, geothermal and hydrogen energy. We promote generation of electricity, heating and fuels from Renewable Energy in order to conserve fossil-fuel resources and to use clean energy.

This association, in its last five-year-international-effort, has been able to be reference of access for Iranian companies to technical and engineering services and global facilities with its membership in assemblies like IRENA, Global COP Conference, and APVIA. Iran Renewable Energy Association, by holding an annual exhibition and international conference of renewable energies has made the biggest gathering of the experts in this field in Iran. This

IRAN RENEWABLE ENERGY AWARD

The 4th Iran Renewable Energy Award

Introduction

In order to promote and develop renewable energy, numerous international awards in the field of renewable energy are awarded to activists in this field all around the world, including scientists, investors, innovators, equipment manufacturers, media, students, and so forth. According to the development of renewable energy in recent years in the country, it is necessary that the prestigious national renewable energy award with its specific goals, which is described below, plays a role in completing the development ecosystem in this field.

This award is the only valid award in this field supported and supplement by all associations related to renewable energy, such as Renewable Energy and Energy Efficiency Organization (SATBA), Ministry of Energy, Vice Presidency of Science and Technology and other responsible institutions and organizations.

Therefore, the Third National Renewable Energy Award will be held simultaneously with the 7th Iran International Renewable Energy Conference and Exhibition in January 2023 this year and will be awarded to the best renewable energy projects and activists to appreciate their efforts, to introduce the best examples of the country to the community of renewable energy activists, and to share successful experiences in this field.

Iran Renewable Energy Award

Following Iran's high potential in all different renewable energy resources, it can play a crucial role in increasing the renewable energy use all around the world. If it happens beside the cultural and social solutions, it can experience a huge growth in science and technology development. Hence, Iran Renewable Energy Association hopes to encourage and promote the maximum use of renewable energy in the society which leads stakeholders to foster their cooperation and

IRAN RENEWABLE ENERGY AWARD

Award

Iran Renewable Energy Award is a national symbol and event that pays attention to the following factors to increase the legitimacy of its implementation.

- ❑ Using a scientific and logical approach to evaluate award recipients
- ❑ Using national and international experiences to design and implement the award process
- ❑ Utilizing the maximum presence of stakeholders and experts in this field to judge and evaluate applicants in the form of policy council and arbitration committee
- ❑ Targeting the major players in this ecosystem to select the best of them in one

Goals

- ❑ Promoting and raising public awareness in the field of renewable energy
- ❑ Motivating all relevant sectors for renewable energy development
- ❑ Expanding the influence of the renewable energy use in Iran
- ❑ Recognition of successful national examples of renewable energy development
- ❑ To the formation and completion of the renewable energy ecosystem with the presence of actors in this field
- ❑ Creating a platform for introducing superior models in various technological, industrial, financial, and investment sectors.

participants

- ❑ Renewable Energy Project
- ❑ EPC Company
- ❑ Outstanding academic renewable energy scientist
- ❑ Equipment Manufacturing Company
- ❑ Governmental and Public Organizations
- ❑ Distribution and Regional Electricity Companies
